HOW TO MEASURE

Our garments are cut to accommodate active working conditions. Here's how to get the correct size and ensure a comfortable fit.

LADIES

Be sure to measure your body. Do not measure over shirts or slacks. Hold tape measure close but not tight against the body.

Bust:

Measure across fullest part of bust/chest keeping arms relaxed at sides. Keep tape measure straight and parallel to the floor.

Waist:

Measure at your natural waistline at its smallest part. Low Hip:

Measure the widest point of your hip, approximately 8" below your natural waist.

High Hip:

Measure the protruding points of your hip bones, approximately 3" below your natural waist.

MEN

For men, as a general rule, the number of inches measured will equal your size, when measured correctly. Be sure to measure your body. Do not measure over shirts or slacks.

Neck:

Measure around base of neck (lowest part). Number of inches equals neck size.

Sleeve Length:

Start from the center of the back of neck and measure across the shoulder to the elbow and down the wrist.

Chest:

With arms at sides, measure across fullest part of the chest, under arms and across shoulder blades. Keep tape measure straight across back.

Waist:

Measure your natural waist at the height you normally wear your pants. Keep the tape measure firm but not tight. Inseam:

Measure inside of leg from crotch down to top of shoe. Or, measure a similar style of pants that fit well. Measure from the crotch seam to the hem.

Low Hip:

Measure the widest point of your hip, approximately 8" below your natural waist.
